What Our Customers Say	17
Your Adventure Starts Here	18

We build every van as if we were building it for ourselves.

VanKind was created from a simple belief: a campervan should be more than just a vehicle. It should be a space that helps you explore further, travel comfortably and enjoy the freedom that comes with life on the road.

As a family-run business, we're passionate about creating campervans that are practical, beautifully finished and built to last. Every conversion is completed in-house by our small team, allowing us to maintain the quality, attention to detail and personal service that our customers value.

We're not a production-line converter. We intentionally limit the number of vans we build each year so every customer receives the attention, craftsmanship and support they deserve.

Whether you're planning weekend escapes, extended road trips or full-time adventures, our goal is simple: to create a campervan you'll be proud to own and excited to use for years to come.

Built for the journeys you'll actually take.

Choosing a campervan conversion is a significant investment, and no two converters approach a build in the same way. At VanKind, we focus on creating premium campervans that combine thoughtful design, proven systems and exceptional build quality, giving you the confidence to travel wherever the road takes you.

Off-Grid Freedom

Our electrical systems are designed to keep you independent for longer, with lithium battery storage, solar charging, inverter power and intelligent monitoring as standard.

Built to Last

Behind every finished interior is careful attention to the details you don't always see, from insulation and vapour barriers to electrical installation and furniture construction.

Premium Components

We use trusted brands including Victron, Truma and Fogstar, chosen for their reliability, performance and long-term support.

A Personal Experience

You'll work directly with the people building your van. No sales departments, no account managers and no being passed between teams.

Designed Around You

Every customer travels differently. That's why we offer a wide range of layouts, finishes, upholstery options and upgrades to create a van that suits your lifestyle.

Support Beyond Handover

Our relationship doesn't end when you collect your keys. We're always available to help, and every full conversion includes annual habitation checks for as long as you own your van.

Meet the Founders

VanKind is a family-run business founded by brothers Dan and Davie Langham, built on a shared passion for travel, craftsmanship and creating campervans that are designed to be used and enjoyed. By keeping the business intentionally small, they remain closely involved in every project, ensuring each build receives the care, attention to detail and personal service that has become synonymous with the VanKind name. From your first conversation to handover day, you'll be dealing directly with the people building your campervan.

ELECTRICAL SYSTEM

Power wherever you travel

Every VanKind build is powered by a professionally designed electrical system built around industry-leading Victron Energy components. Known for their reliability and performance, Victron systems allow our vans to operate completely off-grid without compromising on comfort.

From lithium battery storage and intelligent charging to solar integration and monitoring, every element is carefully planned and installed to ensure dependable power wherever the road takes you. The result is a system that is efficient, expandable, and built to support real adventure.

INCLUDED/RECOMMENDED SPECIFICATION

- 300Ah Fogstar Pro Lithium Battery
- Victron MultiPlus II 3000W Inverter/Charger
- 400W Solar Charging
- Victron Smart Monitoring
- 50A DC-DC Charging
- Shore Power Connection
- Consumer Unit & Safety Protection
- USB & 240V Power Outlets

BRANDS WE USE & TRUST

HEATING SYSTEM

Comfort in every season

Every VanKind build features a professionally installed heating and hot water system built around the trusted Truma Combi boiler. Known for its reliability and performance, the Truma Combi gives our vans consistent heating and hot water for comfortable travel in every season.

From fast cabin heating and efficient water warming to compact installation and proven control systems, every element is carefully considered and integrated to ensure dependable comfort wherever the road takes you. The result is a system that is efficient, refined, and built to support real adventure.

INCLUDED/RECOMMENDED SPECIFICATION

- Combi D 4 E (Next Generation)

BRANDS WE USE & TRUST

WATER SYSTEM

Practical & reliable

The van features a fully integrated underslung water system, designed to maximise internal space while providing reliable off-grid capability. A 92L fresh water tank and 62L waste (grey) water tank are securely mounted beneath the vehicle, keeping the interior uncluttered and allowing for a clean, spacious layout inside.

Both tanks are fitted with level sensors, with real-time monitoring available via the internal display, so you can easily keep track of water usage during your trips. For added convenience, the system includes an automatic grey water dump valve, which can be operated from inside the van, making emptying quick, clean, and hassle-free without needing to crawl underneath.

Filtered drinking water

Every VanKind build includes a dedicated Water2 filtration system, giving you clean, great-tasting drinking water directly from your onboard tank. The system removes impurities, chlorine and unwanted tastes while maintaining strong water flow.

Water2 

Built for year-round comfort

Built for year-round comfort, the van is fully insulated using a combination of thermal and acoustic materials to create a space that feels warm, quiet, and well protected from the outside.

We start with sound deadening applied directly to the van's metal panels, reducing road noise and vibration while driving. This is paired with high-performance insulation throughout the walls, ceiling, doors, and structural cavities, helping to retain heat in colder months and keep the interior cool in warmer conditions.

A combination of recycled bottle insulation and thermo fleece is used to fill voids and prevent cold spots, while rigid

insulation boards are installed in key areas to improve overall thermal efficiency.

A continuous vapour barrier is applied throughout the build to manage condensation and protect the structure over time, ensuring the van remains dry, comfortable, and durable in all conditions.

The result is a noticeably quieter, more stable environment, whether you're on the road, parked up in the rain, or settling in for the night off-grid.

Certification & Compliance

Every VanKind conversion is completed with careful attention to safety, quality and legal requirements. As part of the handover process, you'll receive documentation to give you confidence in your van and support future ownership, insurance and resale.

Electrical Certification

The electrical system is one of the most important parts of any campervan conversion. Every VanKind electrical installation is thoroughly inspected and tested to ensure it operates safely and performs as intended. A full electrical certification is provided following completion of the build, covering the 230V mains system, consumer unit, charging equipment and associated electrical components.

This certification confirms that the installation has been professionally tested and meets the relevant safety standards, giving you confidence whether you're connected to shore power or living off-grid.

Weighbridge Certificate

Every completed VanKind conversion is taken to a certified public weighbridge before handover.

You'll receive an official weighbridge certificate showing the completed vehicle weight, helping you understand your available payload and ensuring you have accurate information for insurance, travel and future upgrades.

This provides complete transparency and peace of mind that your van has been professionally weighed after conversion.

Safety Equipment

Your safety is just as important as comfort when travelling in a campervan. Every VanKind conversion includes essential safety equipment as standard, helping you enjoy your adventures with confidence from day one. Carefully selected and professionally installed, these systems provide early warning and protection against the most common risks associated with campervan living.

Carbon Monoxide Alarm

Carbon monoxide is a colourless, odourless gas that can be produced by fuel-burning appliances.

Every VanKind conversion includes a dedicated carbon monoxide alarm, positioned to provide effective monitoring of your living space and give an immediate warning should dangerous levels ever be detected.

Smoke Alarm

A smoke alarm is fitted as standard in every conversion to provide early warning in the unlikely event of a fire.

The alarm is positioned to maximise effectiveness within the living area, helping to keep you and your passengers safe whether you're cooking, sleeping or relaxing inside the van.

Fire Extinguisher

Every VanKind conversion includes a fire extinguisher securely mounted in an accessible location.

Should an emergency arise, you'll have immediate access to fire suppression equipment designed to help deal with small fires quickly and safely.

THE VANKIND PROCESS

From first conversation to first adventure

Commissioning a campervan conversion should feel exciting, not overwhelming. That's why we've created a straightforward process that keeps you informed, involved and confident every step of the way.

From your initial enquiry through to handover day, we'll guide you through the journey, helping shape a campervan that's tailored to how you travel while keeping the entire experience simple and enjoyable.

1 INITIAL CONSULTATION

We'll take the time to understand how you plan to use your campervan, where you travel, who's travelling with you and the features that matter most. Whether you're considering a signature build or something completely bespoke, this is where we begin shaping your ideal van. At this stage we'll discuss layouts, off-grid capability, design preferences, budget and timescales.

2 SECURE YOUR BUILD SLOT

Once you're happy to move forward, a build slot deposit secures your place in our schedule. This allows us to begin planning your project and ensures dedicated workshop time is reserved exclusively for your conversion. If you haven't sourced a vehicle yet, we can also assist with finding a suitable base van.

3 DESIGN & SPECIFICATION

Before the build begins, we'll work through the finer details of your conversion. Together we'll finalise layouts, materials, upholstery, colours, electrical upgrades, water systems, accessories and any bespoke features you'd like incorporated into the build. Our role is to guide you through the options and make recommendations based on real-world campervan experience.

4 BUILD BEGINS

With the design signed off, your van enters the workshop and the transformation begins. The build follows a carefully planned process, starting with vehicle preparation before moving on to the installation of windows, vents, sound deadening and insulation. From there, we complete the first fix electrical and plumbing systems, followed by the heating and water systems, cabinetry and furniture construction, and all interior finishing work.

5 FOLLOW THE JOURNEY

We know how exciting it is to watch your campervan take shape. Throughout the build you'll receive regular updates through our client portal, including photos, videos and progress reports from the workshop. This allows you to follow the transformation from empty van to completed camper, wherever you are.

6 TESTING & CERTIFICATION

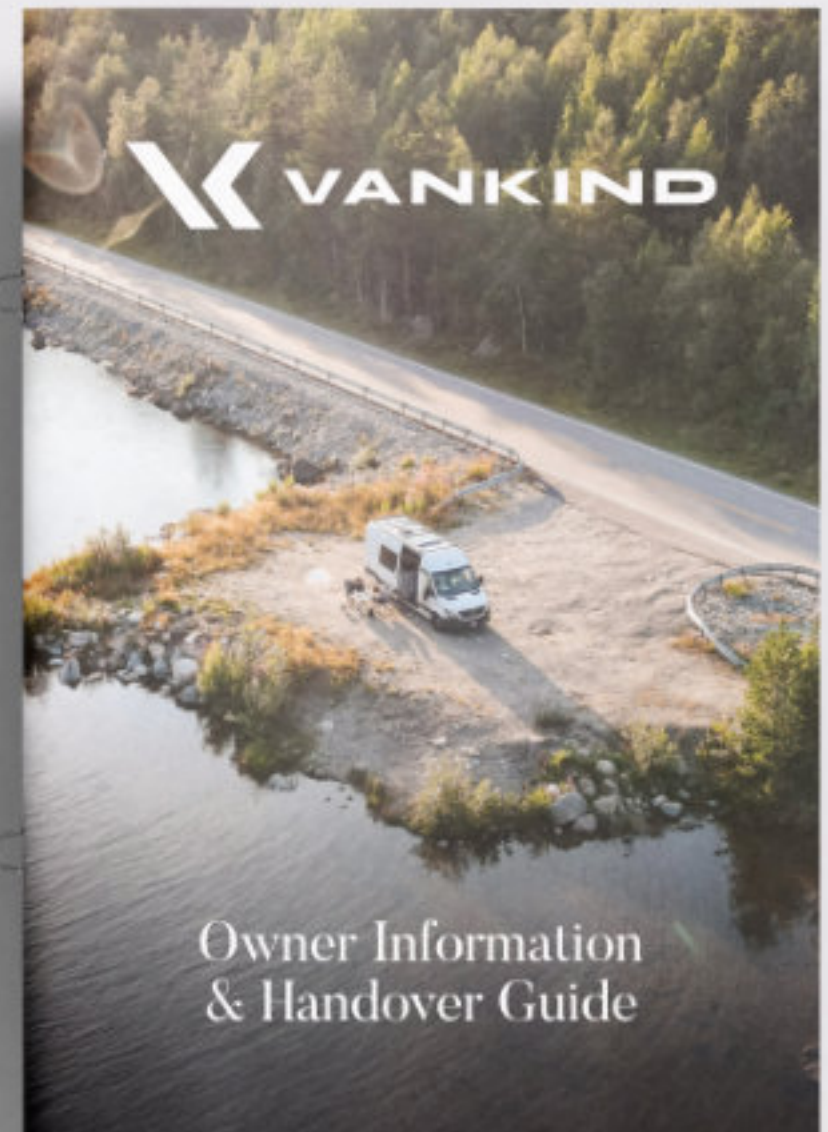

Before handover, every system is thoroughly tested and inspected. This includes electrical testing, water system checks, appliance commissioning and a certified weighbridge visit to confirm the completed vehicle weight. We take the time to ensure everything performs exactly as intended before the keys are handed over.

7 HANDOVER DAY

The best part of the process. We'll walk you through every aspect of your new campervan, explaining how the systems work, answering any questions and ensuring you're comfortable operating everything before you leave. You'll also receive your documentation, certification and handover pack. Then it's time to start making memories.

8 ONGOING SUPPORT

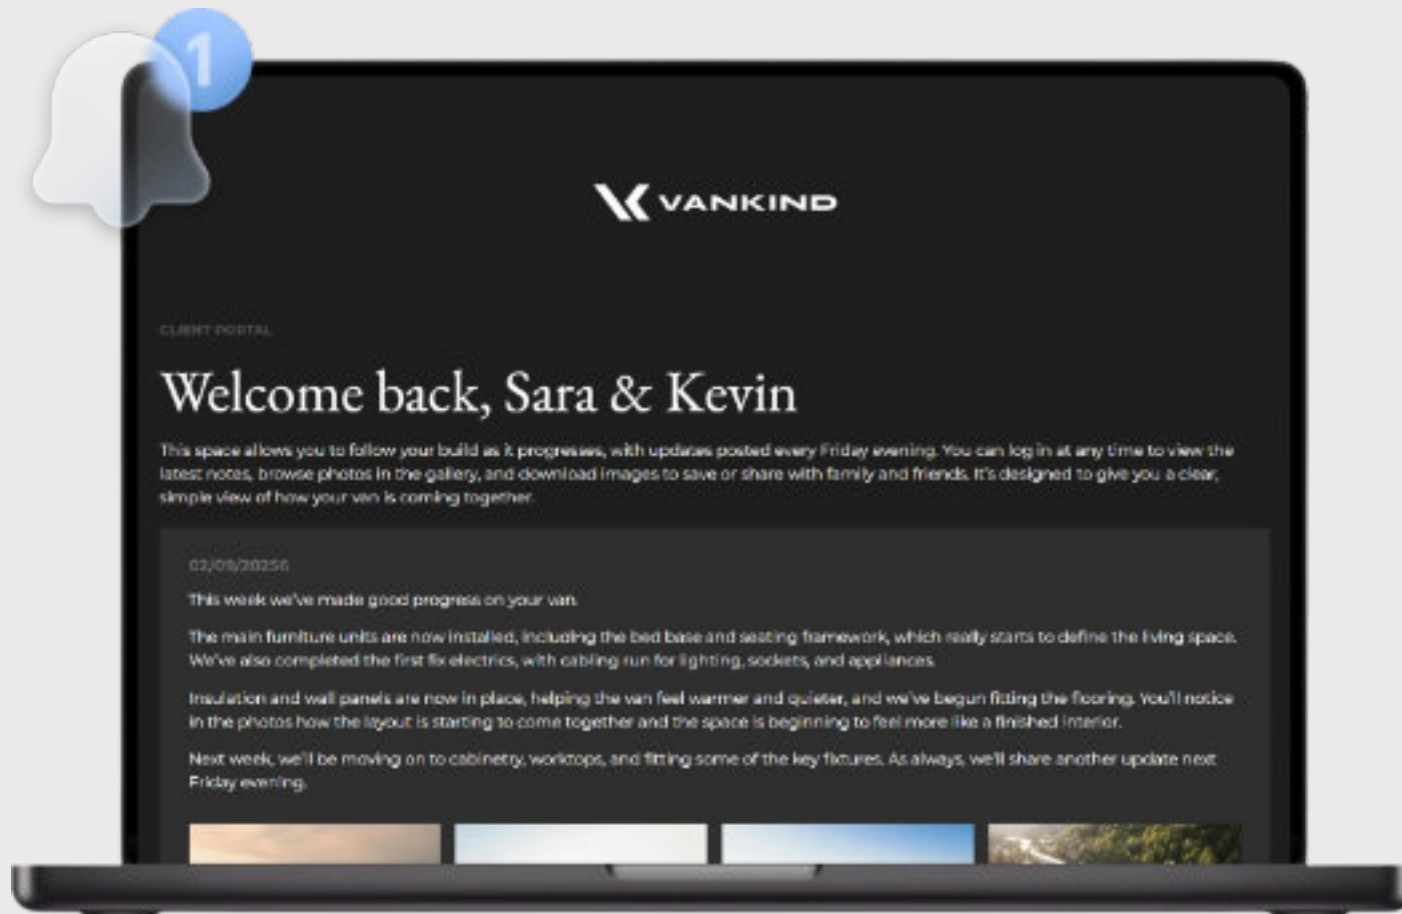

Our relationship doesn't end when you drive away. Every full VanKind conversion includes a complimentary annual habitation check for as long as you own the van. We stand behind our workmanship and want every customer to continue enjoying their campervan for many years to come. Whether you need advice, servicing support or simply have a question about your van, we're always here.

THE CLIENT PORTAL

Follow your build

Track the progress of your van from the first day in the workshop to the final handover. Through our client portal, you'll receive regular updates, photos, and videos so you can see your campervan take shape at every stage.

Complimentary Annual Habitation Checks

Every full VanKind conversion includes a complimentary annual habitation check for as long as you own your campervan. This gives you the reassurance that key systems are performing correctly while allowing us to identify any issues before they become larger problems.

Interior & Construction

- Furniture inspection
- Cabinetry adjustments if required
- Door and drawer operation checks
- Interior fixture inspection
- Windows, Rooflights & Ventilation
- Window inspection
- Vent and fan checks
- Seal condition assessment
- Leak prevention checks

Electrical System Checks

- Battery health assessment
- Battery balancing
- Charging system checks
- Solar performance checks
- Inverter and shore power testing
- Electrical safety inspection

Water System

- Water tank inspection
- Water filter inspection
- Water system checks
- Fresh water system
sanitisation recommendations

Heating & Hot Water

- Truma system inspection
- Boiler operation checks
- Heating performance testing
- System diagnostics

"We're not just building campervans. We're building long-term relationships with the people who own them."

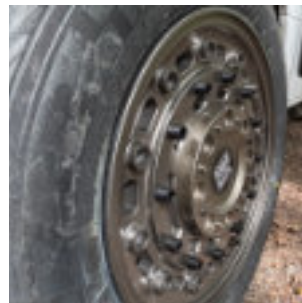

The Retreat

Designed for couples, adventurers and those who want the freedom to travel without compromise, The Retreat combines premium craftsmanship, intelligent design and serious off-grid capability in one beautifully finished campervan.

Built around years of real-world travel experience, it provides everything you need to explore comfortably, whether you're spending a weekend on the coast or several weeks off the beaten track.

CONVERSION GUIDE PRICE £48,950 INC VAT

BUILD TIME 8-12 WEEKS

The Retreat is our starting point, not a limitation. Every VanKind build can be tailored to suit your travel style, preferred layout and personal taste, creating a campervan that's uniquely yours.

LOOKING BEYOND THE INITIAL INVESTMENT

A Different Way to Think About Ownership

When considering a campervan conversion, it's natural to focus on the upfront investment. But unlike many purchases, a professionally converted campervan often continues to hold value long after the adventures have been enjoyed.

While no vehicle is immune to depreciation, quality campervans built using premium components and professional craftsmanship are often in demand on the used market, particularly when they have been well maintained.

Our conversions typically start around £48,950 inc VAT

MORE THAN JUST A HOLIDAY

A family holiday might create memories that last a lifetime, but once it's over, the money is gone. A campervan offers something different. It gives you the freedom to take countless weekends away, explore new places and create years of adventures, all while owning an asset that may still retain a significant proportion of its value.

BUILT TO REMAIN DESIRABLE

- ✓ Professional conversion quality
- ✓ Premium electrical and heating systems
- ✓ Trusted brands such as Victron and Truma
- ✓ Practical layouts
- ✓ High-quality materials and finishes
- ✓ Evidence of maintenance and care

THE COST OF ADVENTURE

Many owners are surprised when they look back after a few years of ownership and realise how much use they've had from their campervan compared to what it ultimately cost them. If the time ever comes to sell, a well-maintained campervan can often return a significant portion of the original investment, meaning years of adventures may have cost far less than expected.

SUPPORTED FOR THE LONG TERM

Every full VanKind conversion includes complimentary annual habitation checks for as long as you own the van. Not only does this help keep your campervan performing at its best, but it also demonstrates ongoing care and maintenance throughout ownership.

REAL FEEDBACK FROM REAL VANKIND OWNERS.

Kind Words From Our Customers

"We've already spent over 40 nights in our van since collection and absolutely love it. Everything has worked flawlessly, from the electrical system and solar setup to the heating and hot water. It genuinely feels like a boutique hotel room on wheels. We can't wait for our next adventure."

Sarah & Mike, Peugeot Boxer Conversion

"We've looked at a lot of campervan conversions over the years, and the attention to detail in our VanKind build genuinely stands out. Every cupboard, panel and finish feels solid and well thought out. The van not only looks beautiful but functions perfectly for long trips off-grid."

Emma & Chris, Citroën Relay Conversion

"One of the things that impressed us most was the transparency throughout the build. The Friday progress updates were brilliant and gave us complete confidence that everything was on track. Any questions were answered quickly, and nothing ever felt like too much trouble. The whole process was enjoyable from start to finish."

Rachel & Ben, The Retreat

"The quality of the build speaks for itself. Every detail has been carefully considered, from the layout and storage solutions to the electrical system and finishing touches. It's clear that VanKind genuinely care about their work and take pride in every van they build."

David & Claire, Sussex

"We had a vision for how we wanted to travel, but VanKind helped us turn that vision into something even better. The team offered practical suggestions throughout the design process and created a van that perfectly suits our lifestyle. We couldn't be happier with the result."

Martin & Julie, Kent
